LISTENING 2 (Items 6–10

You are going to hear a short text about Elephants.
Listen and complete the table with (T) if the phrase is true or (F) if the phrase is false.

Elephants are big and friendly animals. Baby elephants grow inside their mom for a long time, almost two years. When baby elephants are born, they're already very heavy. They weight about 106 kilograms. Baby elephants are called calves, and they learn to use their trunks for eating and playing. As they get older, their teeth grow long, and those are called tusks. Elephants live in families and spend their time playing in the water and learning from the older elephants. When they grow up, they become strong and join the group. Elephants can live to be 60-70 years old in the wild.
